### TECHNICAL SUPPORT

Available from Monday to Friday, from 8 a.m. to 6 p.m. Brasilia time

+55 0800 603 2330 or +55 62 3241 4600 suporte@faaftech.com.br

www.faaftech.com.br

#### Instalation

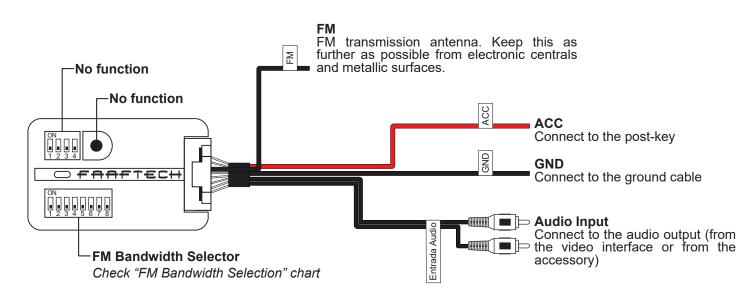

The car ignition must be off during the installation process.

1st Connect the red (ACC) and the black (GND) cables.

2nd Connect the audio input RCAs on a video interface or on an external accessory, such as a DVD, a TV or a mirroring module.

3rd Setup the "FM Selector" switches according to the "FM Bandwidth Selection" chart.

Important Notice: The chart shows 50 different bandwidths you can use. Choose the best option before finalizing the installation process. Try to choose a bandwidth that is not being used by any nearby radio stations, to avoid interference. If you choose a bandwidth that is already being used by a radio, you will suffer interference on your vehicle.

## FUNCTIONING

Once the installation is finalized, the device will transmit the audio via FM on the selected bandwidth.

To use it, just turn on the multimedia and tune in the bandwidth you selected during the installation process.

If the multimedia has an RDS function, "FAAFTECH" will be shown as the radio station's name, as pictured below:
